I am writing regarding HB4026. I wish to express my concern regarding this bill's restrictions regarding local traffic and weather reports being broadcast on XM Radio. I travel throughout the los angeles basin as well as orange county and riverside due to my work. I use these reports to help me navigate around traffic trouble areas. These reports are comprehensive and extremely helpful. I get the reports fast and often. Local radio stations are more concerned about getting their commercials in and there is less time available for the traffic reports which are often abbreviated and incomplete. Since I am paying for the xm service, they are not concerned about about commercials and can give complete and comprehensive reports. I respectfully request that you oppose this bill as it restricts consumer choice and dictates what a pay for service product can provide to its subscribers. Thank you
